But this charm would probably be lost could the smoker be aware of the manner in which he was systematically duped by chemical treatment of his favorite weed. The substances used to impart flavor are numerous, and the formulas for telliano, Frisco; M H Brown, Beaver their employment equally plentiful.

The tonka bean, balsam first pedar oil, and valerian are a few more of the most generally used flavoring substances. But by far the groundst injury to the smokers. the greatest injury to the smokers, the writer asserts, is produced by 2he introduction into the eigar of burned ammonia, and the soaking of them in saltpetre. This is done 20 make the cigar burn freely. Again, seme manufacturers treat their weeds with sulphuric acid and bromide of potassium, and these produce an effect akin to alcoholic intoxication. Adulteration is more or less extensively resorted to in the preparation of the tobacco itself, use being often made of potato leaves, sugar, potash, tamarinds, anise-seed, gum and different oils. The cigar product of New York City amounts to 826,666,000 annually, and the cigarette supply reaches 229,800,000 a year, 25,000 persons being employed in the mannfacture. How many of the cigarettes and cigars are made from discarded stumps is not stated, but from the fact that many boys seem to be making money by gathering these cast out bits of nastiness, it is fair to presume that no small profair to presume that no small proportion of the alleged new cigars and eigarettes are really second-hand

One of these days there will not be enough people and property to support a state government, when about the only thing that can be done with our western neighbor will be for some of the surrounding states and territories to take her in out of the wet. California may be better able than Utah to support Nevada, but the map would look better if the state were hitched to this territory, where it originally found shelter and protection.
